

Why are there two entrances to Office 365?

SPIRITSDS

School Entrances

SCHOOL LOGIN

This is your school login where you can work with other staff and students on learning projects or communicating within your local school community. Your credentials are the same credentials that you would use to login to a computer workstation at your school.

TRUSTED COMMUNITIES

A tenant has been created for each school so only the staff and students of that school have access to their respective community. Individuals can invite others from outside their school to view selected media but the community within remains protected and everyone within a school is accountable to each other and is visible through automated data tagging and online presence features.

PRIVACY

This is not like other Internet spaces or public social media tools. Instead it is like your local network with the ability to share beyond but only on an individual basis. You remain as private as you choose to be and all activity is traceable to the students and staff in your school.

ALL STAFF Entrance

PROFESSIONAL LOGIN

A single tenant has been created for all staff in the school division. This is your professional login that you have been using since Prairie Spirit was first created in 2006. You have always used these credentials to access your email or a web service and this remains unchanged.
